Ponte Health Releases Phiibi v4.5 :

The World's First Domain-Specific AI for Healthcare Facilities

Healthcare Facilities domain-specific AI assistant, is now available globally at \$7.99/month for students, researchers, professionals, contractors, and healthcare providers

DECEMBER 25 2025 — Ponte Health today announced the release of Phiibi v4.5, a domain-specific artificial intelligence designed exclusively for the healthcare industry focusing on healthcare facilities. Priced at \$7.99 per month, Phiibi is positioned as the most affordable specialized AI for healthcare facility planning, design, construction, and management worldwide.

Unlike general-purpose AI models, Phiibi delivers expert-level guidance across the entire healthcare facility lifecycle: real estate and transactions, planning and programming, architectural design, engineering coordination, pre-construction controls, construction delivery, construction management, facilities operations, and maintenance planning. As a Large Language Model, Phiibi can assist in every language to every part of the world.

"Healthcare facility expertise has traditionally been locked behind expensive consultants and years of specialized experience — and those experts are few and far between," said Tabitha Ponte of Ponte Health. "Phiibi changes that. A student in Mumbai interested in hospitals, a clinic owner in rural Texas, an architect in California, an engineer in Miami, a contractor in Dubai, or a researcher in Tokyo now have unlimited access to the same caliber of healthcare facilities intelligence, at a minimal barrier to entry."

Phiibi v4.5 supports all healthcare facility types including ambulatory surgery centers, hospitals, medical office buildings, imaging centers, specialty clinics, and long-term care. The AI provides regulatory guidance across multiple jurisdictions, covering US state agencies (AHCA, HCAI, DOH), federal requirements (CMS, OSHA, HIPAA), and international standards including WHO guidelines, Joint Commission International, and country and regional building codes and standards.

The \$7.99 monthly subscription requires no long-term commitment and includes unlimited queries across all capability areas.

Phiibi is available now at <https://phiibi.ai>

About Ponte Health

Ponte Health brings top-tier architecture and construction management experience, with a decade focused on healthcare facilities in Florida. The firm specializes in ambulatory surgery centers, other medical inpatient and outpatient facilities, technical and construction controls, facility technology integration and data, and complex compliance.
